

Mixer Guide

Caframo[®]
LabSolutions

The Crossover

- Make your job easy - A fully featured mixer
Powerful, portable plug-in installation
- Capture data - Speed, torque, time, date
- Mix batches - Media, buffers, creams
No motor burn out
- Build into a modular system and control
by a PLC - LabVIEW compatible
- Safety certified to applicable standards

Built for Real Work

- High efficiency, 300 watts at shaft
- Brushless DC motor - fan cooled
- Overload and overheat protected

Set-up Accessories

A129 Plate Mount

- 260 x 100 mm (10 x 4 in)
- 6.4 mm (¼ in) thickness
- 304 electropolished stainless steel

Sturdy simple mounting solution. Secure to existing horizontal surfaces, mixing equipment, drum brackets or industrial stands. Slotted bolt pattern provides adjustability when mounting.

A128SET C-Clamp Set

- Single bolt adjusts angle on two axes
- Attaches directly to a drum, frame or stand
- Cast 304 electropolished stainless steel

Mount the Caframo Crossover mixer to any stable vertical including an industrial stand, drum or vessel. Easy single bolt adjustment for multi-angle positioning.

Set includes c-clamp, clamp adapter and hardware. Standard tool installation.

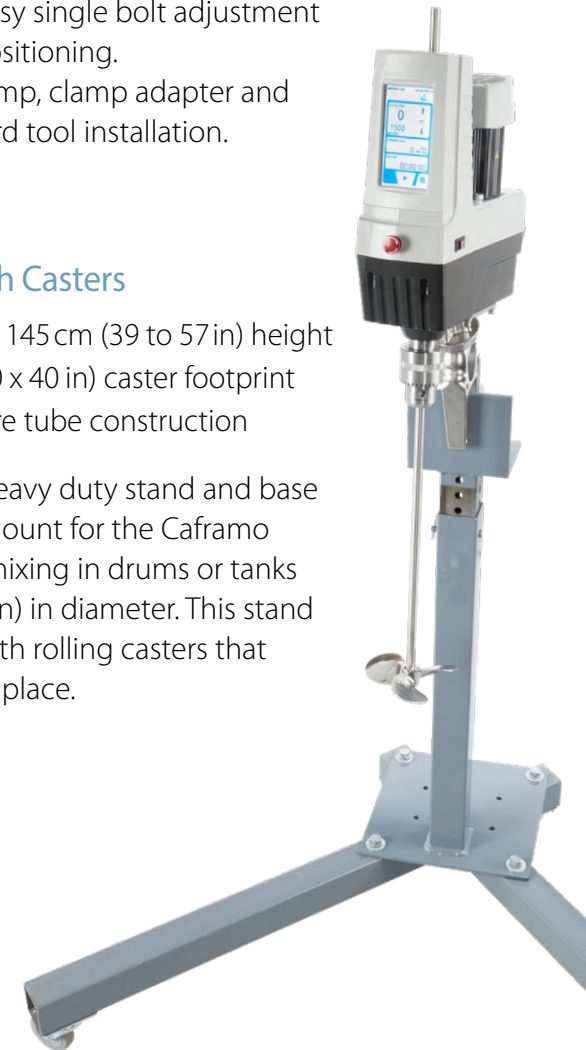

A118 Stand with Casters

- Adjustable 99 to 145 cm (39 to 57 in) height
- 102 x 102 cm (40 x 40 in) caster footprint
- Plate steel, square tube construction

This manual lift, heavy duty stand and base provides a solid mount for the Caframo Crossover when mixing in drums or tanks up to 122 cm (48 in) in diameter. This stand comes with smooth rolling casters that swivel and lock in place.

Accessories

Communication Ports

Mini USB

PC Control - communicate using command set.

DB9 Serial Port - RS232

PC or PLC Control and legacy ethernet connectivity. Adapt to RS485 and daisy chain mixers together.

Analog 4-20 mA

Stable PLC control over long distances. Simple wiring scheme widely used in industry.

Standard USB

Data logging and software updates. Process starts as soon as memory stick is inserted.
