

# Drosophila Incubators

Energy Efficient Peltier Series

Expanding on our current thermoelectric (Peltier) refrigerated incubators, the SHEL LAB Drosophila units utilize day/night controls along with LED lighting to provide an excellent environment for drosophila culture. The cabinets are designed with a mechanical convection system to ensure a gentle and even air distribution. A programmable day/night microprocessor temperature controller and over temperature limit control ensure a proper and safe environment.

The energy saving thermoelectric cooling system provides improved temperature uniformity and up to 78% less power than traditional compressor based models. These units are covered under a two year warranty and are certified to current global standards.

## Precise Temperature Control - Superior Uniformity

- Independent Over Temperature Thermostat
- Door Ajar Alarm
- Temperature Range 15°C to 40°C at 20°C Ambient

**2 Year**  
Limited  
Warranty!

| Drosophila Series                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Model Number                    |                                     |                                    |
