

Secador® 5.0 Desiccator Cabinets

Available in two configurations, these light weight Secador 5.0 Desiccator Cabinets provide dry storage for humidity sensitive products such as laboratory reagents and samples, optical equipment, electronics, and 3D printing filament.

- High density foam gaskets keep ambient humidity out and dry air inside
- Large clear polycarbonate panels are durable and allow the contents to be easily visible
- LCD displays internal temperature and humidity level
- Electronic model can be operated from power sources from 100 VAC to 240 VAC without the need for a power converter
- Non-electronic model can be used with any Bel-Art desiccant product
- Includes 3 removable shelves which can be adjusted within the spacious 1.6 cu. ft. cabinet interior. Additional shelf can be purchased separately
