Spectra provides a comprehensive selection of new and used microscopes from many of today's leading manufacturers as well as complimentary products such as motorized stages, digital cameras, fiber optics, measurement equipment and image analysis software. Whether you need a single microscope, complete imaging system or a custom-designed imaging solution, our experienced

imaging specialists will demonstrate our products and help you determine the products that best meet your requirements. If you're unsure of exactly what type of solution you need, we can advise you based on your unique applications. Spectra provides after-sale service and support for our entire line of products.
