

THE NEW

# Reichert *TS Meter-D* Clinical Digital Hand-held Refractometer

The performance of a lab instrument.  
The ease and price of a hand-held.

**From the company that brought you the Goldberg *TS Meter*—the industry standard.**

The Reichert *TS Meter-D* is the first clinical digital, hand-held refractometer that performs as well as most laboratory-grade refractometers. Yet it offers the ease of use and price of a hand-held. It's designed to automatically read samples with precision comparable to high-end automatic refractometers. Operator interpretation of unclear shadowlines is no longer necessary.

**New sapphire prism for greater durability and accuracy.**

The *TS Meter-D's* new sapphire prism delivers 2.5x more conductivity to temperature than a conventional glass prism, providing greater accuracy of the Automatic Temperature Compensation (ATC) calculation. The result? A more precise measurement every time! Four times harder than glass, the sapphire prism is resistant to demanding applications, providing lasting durability and service over the life of the refractometer.

*TS Meter-D Refractometer with optional IR Communication Package allows for Reading Log, Calibration Log, and Custom Scale transfer to any PC.*
