

Bio Plas G-Tube®

Premium Flat Top Microcentrifuge Tubes

The **G-Tube® Flat Top Microcentrifuge Tube** is virtually transparent and far exceeds the toughness of any microcentrifuge tubes. When the **G-Tube Flat Top Microcentrifuge Tube** cap is closed there will be an audible "snap" that indicates a secure closure has been formed.

Made of tough, clear, proprietary formulated polypropylene, the 0.6mL, 1.5mL and 2.0mL **G-Tube** has the same chemical resistant quality as standard tubes, but they're sturdier and virtually transparent to give a better view. The flat top cap is easy to open and still provides a maximum secure seal. All three volumes are available in siliconized material. Siliconized G-Tubes are not recommended for autoclaving.

The **G-Tube** is built for high impact usage and will withstand over 30,000 x G when spun. Thicker walls make this the tube of choice for extreme stress, high spinning speeds, autoclaving, boiling, chemical resistance and freezing. Will withstand temperature ranges of -80°C (-112°F) to 121 °C (250°F).

0.6mL G-Tube® Flat Top
Microcentrifuge Tube, Green,4044

0.6mL G-Tube® Flat Top
Microcentrifuge Tube, Yellow,4042

1.5mL G-Tube® Flat Top
Microcentrifuge Tube, Blue 4031

2.0mL G-Tube® Flat Top
Microcentrifuge Tube, Green,4056

G-Tube® Flat Top Microcentrifuge Tube Features:

- Made from high quality medical grade resins
- RNase and DNase free. Human DNA free. Non-Pyrogenic
- Ultra low retention
- Lid Closure: The flat top lid forms an extra-tight seal that will not come open during processing. Yet, it's easy to open with thumb pressure or our handy **MicroTube Tool** (catalog #4000.)
- Bio Plas G-Tubes have a textured writing surface on top of the caps. The 1.5ml and 2.0 mL tubes have an additional textured writing surface on the side of the tubes
- Graduation: The 1.5ml tubes and 2.0ml tubes are graduated every 0.1ml
- Boilproof
- Will withstand speeds up to 30,000 X G
- Easy needle access through the piercing port in the exact center of the cap
- Autoclavable at 250°F at 15 psi for 15 minutes.
- Withstand temperature ranges from -80°C to 121°C
