Expert Key 100 eco

/// Data Sheet

Expert Key 100 eco measures and converts various analog and digital signals so that they can be further processed using the labworldsoft® 6 laboratory software. The connection to a PC is made via USB or Ethernet. Various sensors can be connected to the Expert Key in order to read them out via labworldsoft® 6. Laboratory devices with analog interfaces can also be connected and then controlled and monitored via labworldsoft® 6.

The Expert Key supports:

- 14 analog inputs
- 02 analog outputs
