

designed for scientists

S 25 KV - 2802 Dissolver agitator shaft, high speed

/// Data Sheet

High speed agitator shaft suitable for intensive mixing and for dissipation of agglomerates.

Bearing assembly with ball bearing and mechanical seal (SiC = counter ring and slide ring, o-rings = Kalrez)

- Material: Stainless steel (AISI 316L)
- For operation under vacuum
- Short-term operating temperature: up to 220°C
- Suitable for vacuum and solvents, can be sterilized

designed for scientists
