MT 40P.100 Disposable grinding chamber, bended beater

/// Data Sheet

A new grinding/milling chamber extends the application range of the IKA TubeMill control. Its stainless steel beater is bended in a 45° angle.

Advantages:

- Especially for mixing of fine powders
- Its bended beater creates a more effective flow in the chamber which leads to an even better grinding result
- Recommended mixing speed 10.000 rpm

designed for scientists

Useful volume: 40 ml
Quantity: 100 pieces/pack
Material grinding chamber: PP

designed for scientists

Technical Data

Weight [kg]	2.7
Permissible ambient temperature [°C]	5 - 40
