

## **I-MAG SP 150**

/// Data Sheet

The stainless steel set-up frame extends the footprint and load capacity of the I-MAG industry magnetic stirrer. The robust frame is designed for barrels up to approx. 150 liters and a maximum load of 200 kg.

The use of the set-up frame is suitable for vessels from a diameter of 300 mm up to a maximum of 500 mm.

The barrels or vessels used only stand on the set-up frame and not directly on the drive unit (I-MAG Drive). This allows the drive unit to be simply pulled out from under the barrel, without having to move the vessel standing on it which enables flexible use of the unit.

## designed for scientists

## **Technical Data**

| Maximun load [kg]                    | 200                    |
|--------------------------------------|------------------------|
| Material                             | stainless steel 1.4301 |
| Dimensions (W x H x D) [mm]          | 500 x 80 x 540         |
| Weight [kg]                          | 10                     |
| Permissible ambient temperature [°C] | 5 - 40                 |
