RV 10.6 Vertical-intensive condenser with manifold and cut-off valve for reflux

/// Data Sheet

Vertical intensive condenser with distributor and stop valve for reflux distillation. The distributor features a condensate cover and an outlet channel which prevent the condensate from coming into contact with the seal. The solvent to be distilled can be continuously fed in through the PTFE inlet tube.

designed for scientists

Technical Data

Type of cooling	vertical
Cooling surface [cm ²]	2000
Weight [kg]	1.562
Permissible ambient temperature [°C]	5 - 40
