

MI-150 REMOTE

A slick and sophisticated unit, the MI-150 offers safe and hassle-free operation. All models mate securely with standard microscopy light guides, eliminating adapters. Audible noise and vibration is minimal, and lamp changing is fast and easy due to the convenient side door. The MI-150 delivers 350,000 foot candles of high high-intensity, cold light illumination with a lamp life of over 1,000 hours. Meeting the performance standard of any illuminator on the market today, the MI-150 unit is available separately or as part of a complete Fiber optic illumination system.

The MI-150 is UL, CE, and C-UL approved for global use. All Fiber-Lite MI-150 Illuminators come backed with a lifetime warranty. No adapters required for MI Series Accessories.

Everything you've come to expect from the MI-150 with the added convenience of remote operation. Intensity and ON/OFF operation is controlled remotely via a 7 foot or 12 foot cable. Available in 115 or 230 VAC with optional filter holder.

The MI-150 is UL, CE, and C-UL approved for global use. All Fiber-Lite MI-150 Illuminators come backed with a lifetime warranty.
