LOW TEMPERATURE CHEST FREEZER |
STORES YOUR SAMPLES UNDER OPTIMAL CONDITIONS
The single compressor technology provides reliable low temperature freezing and high temperature uniformity.

▶ COOLING SYSTEM

Arctiko's SF 150 utilizes our single compressor technology. This means fewer mechanical components taking up space and lowering unnecessary heat-and noise dissipation.

The technology ensures the best possible storage capacity per square meter of any chest freezer models in the market.

With Arctiko, you are maximizing the amount of samples you can store, while retaining the best possible cooling performance.

▶ OPTIMIZED STORAGE CAPACITY

The freezer has optimized internal storage for the best overlook. With the standard included stackable basket and the optional stainless steel front rack storage system the samples will be easy accessible at any time.

The freezer also has a premade access port with no extra cost involved, making it easier to monitor or inspect the unit with external probes.

Optimal storage capacity and overview of the stored samples with the baskets.

▶ FILTERLESS CONSTRUCTION

Our filterless construction makes cleaning unnecessary. The evaporator coils are spaced so far apart that dust will not be trapped and obstruct the airflow.

The filterless construction eliminates the need for filters entirely, saving you maintenance time and cost.

NOISE REDUCTION TECHNOLOGY

The key lock on the handle is a standard feature in our SF Series for optimal security for your samples.

ARCTIKO INT **SF 150**
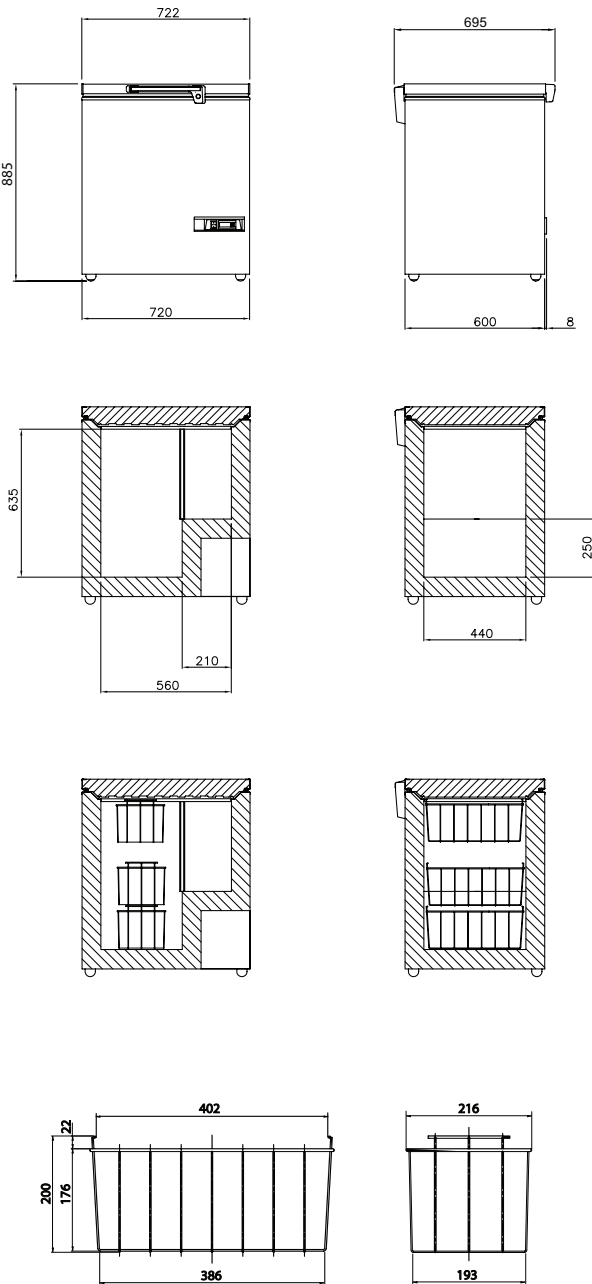

true cooling specialists

The ARCTIKO SF 150 model supports following optional features:

- Temperature chart recorder
- Rollers on metal frame
- GSM alarm module
- Voltage converter
- Voltage stabilizer
- Racks & boxes
- Jumbo basket
- Basket
