-40/-86°

ULTRA LOW TEMPERATURE UNDERCOUNTER | THE ULUF 65 WILL ADD A NEW DIMENSION TO YOUR LABORATORY, USE IT EITHER AS A BENCHTOP OR UNDERCOUNTER. The compact space-saving design and low noise level makes it a perfect storage solution for your laboratory.

▶ COOLING TECHNOLOGY

The small size is achieved by utilizing Arctico's special single compressor technology.

The single compressor technology is specially designed to reduce the number of mechanical components that generates unnecessary heat and noise.

It comes with the same advantages as regular sized -86°C from Arctiko and is best in class in cooling performance.

The user friendly G214 controller is standard for the ULUF 65. It includes different alrams as visual, acoustic, open door and more.

▶ FILTERLESS CONSTRUCTION

Our filter less construction makes cleaning unnecessary. The evaporator coils are spaced so far apart that dust will not be trapped and obstruct the airflow.

With our unique construction, the dust intake is minimal, which eliminates the need for filters entirely, saving you maintenance time and cost.

◀ ULUF 65*

Insulated inner door for better recovery time after door openings and optimal temperature stability.

▶ THE OPTIMAL CHOICE
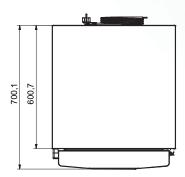

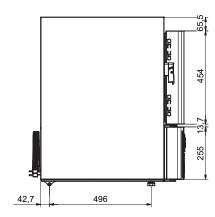

Despite its small size og the ULUF 15, you will get a very reliable ultra low freezer. If the need for samples is minimal, then this is the ultimate freezer.

By choosing a ULUF 15 there will be maximum savings on footprint because of its compact space saving design and a great energy saving compared to other larger units.

FILTERLESS CONSTRUCTION

Key lock is a standard feature in our ULUF 65. Placed on side of door for optimal security for your samples.
